

**In the Claims:**

Kindly amend the claims as follows:

1. (currently amended) An animated device for a vehicle antenna, comprising:  
  
a rising member having an aperture; and  
  
a smooth pole, disposed through said aperture of said rising member, said rising member rotating in complete rotations about said pole as said rising member rises; and  
  
two fixed oppositely disposed wings, in communication with extending laterally outward from said rising member, wherein said fixed wings are planar and perpendicular to the plane of said pole.
2. (previously presented) The device of claim 1, wherein said rising member is lightweight.
3. (previously presented) The device of claim 1, wherein said rising member is a sphere.
4. (currently amended) The device of claim 1, wherein said sphere is lightweight.
5. (previously presented) The device in claim 1 further comprising a sleeve, in communication with said rising member.
6. (previously presented) The device in claim 5 further comprising an indicia, in communication with said sleeve.

7. (currently amended) The device of claim 5, wherein the circumference of said sleeve is ~~larger than~~ larger than the antenna.

8 – 17. (canceled)

18. (new) The device of claim 1, further comprising a sleeve, adjacent to, but not fixed to, said rising member.
